Concours chercheurs 2021 – letter of support Erica Nocerino

To Whom it May Concern

I met Erica during her university education as her professor of photogrammetry. She attended with great interest and motivations the lectures, acquiring advanced skills and passing the exam with maximum scores.

Afterwards, Erica started to collaborate with the 'Photogrammetry and Topography Laboratory' of the Parthenope University, developing an interest in 3D surveying and modelling, especially in the marine field. This led to her second PhD for which I was her tutor and which she got while working as researcher in the 3DOM (3D Optical Metrology) in FBK (Fondazione Bruno Kessler, Trento).

Throughout the years, she has demonstrated a strong passion for multidisciplinary research topics and also proven great ability in working in team or independently.

Erica Nocerino has thus an outstanding record of education, experiences and training activities as well as scientific publications that make her an excellent researcher.

If you would like to discuss further about the candidate, please feel free to contact me.

Best regards,

Naples, 5 January 2021

Salvatore Troisi
