

RE: Concours chercheurs 2021 – letter of support for Erica Nocerino

To Whom it May Concern

I am **Fabio Remondino** and I am the head of the 3D Optical Metrology Research Unit of the Bruno Kessler Foundation (FBK), a public research institute in Trento, Italy. I have also worked as a professor at the University of Bologna, Italy, and I was visiting professor at the University of Innsbruck, Austria and Skoltech in Moscow, Russia. I earned my doctoral degree in photogrammetry from ETH Zurich, Switzerland. As a researcher, I focus on the study of photogrammetry, laser scanning, reality-based 3D modeling, and image processing, among other interests.

Please accept this letter as my official letter of support for **Erica Nocerino** who is going to apply for the concours chercheurs 2021. I worked with Erica for six years when she was a researcher in my research group in FBK Trento. Her primary research interests are in vision-based techniques, at the crossroad of photogrammetry, computer vision and robotics.

Throughout the years, she has demonstrated strong interest and motivation in all the projects we have realized. She has always proven to be a reliable and capable researcher, both in teamwork and independently. Her scientific researches are always novel, original and of high quality, she is a keen worker and a distinguished young scientist. She has also strong expertise in capacity building and fund raising.

I am glad to support Erica's application as researcher for the CNRS.

Please do not hesitate to contact me in case you have questions or doubts.

Best regards,

Trento, 6 January 2021

Fabio Remondino
