Concours chercheurs 2021 – Letter of Support for Dr. Erica Nocerino

To Whom it May Concern

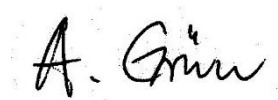

I have been working with Erica for the past three years on an underwater photogrammetry project for coral monitoring in French Polynesia.

During this time, she has proven to be a skilled researcher, diligent, engaged, articulate and able to actively contribute in discussions and research works.

Her distinguished record of education, experiences and training activities as well as her scientific publications make her an outstanding researcher.

I can support her application without any reservations.

Best regards,

A handwritten signature in black ink, appearing to read 'A. Gruen', with a stylized, cursive script.
