Feedback Motivation

The Basic Problem That We Studied

Make Titles Informative. Use Uppercase Letters. Subtitles are optional.

- Use itemize a lot.
- Use very short sentences or short phrases.

You can create overlays...

• using the pause command:

$$\begin{cases}
\partial_t \boldsymbol{\sigma_0}(t) = M^{\flat} \boldsymbol{\sigma_0}(t, 0) + |b \rangle \Upsilon(t) \\
g(t) = \langle c | \boldsymbol{\sigma_0}(t, 0), \end{cases} \tag{1}$$

$$\Delta\theta(t) = \langle c(t) \mid \Phi(t,0)' \eta_0^r + \langle c \mid (t) \int_0^t \Phi(t,\tau) \mid b > (\tau) \Delta\theta_0(\tau) d\tau$$
 (2)

using overlay specifications:

with the definition of the propagator as:

$$\partial_t \Phi(t,\tau) = M(t)\Phi(t,\tau); \quad \Phi(\tau,\tau) = I, \tag{3}$$

You can create overlays...

• using the pause command:

$$\begin{cases}
\partial_t \boldsymbol{\sigma_0}(t) = M^{\flat} \boldsymbol{\sigma_0}(t, 0) + |b \rangle \Upsilon(t) \\
g(t) = \langle c | \boldsymbol{\sigma_0}(t, 0),
\end{cases} (1)$$

•

$$\Delta\theta(t) = \langle c(t) | \Phi(t,0) \boldsymbol{\prime} \boldsymbol{\eta}_0^r + \langle c | (t) \int_0^t \Phi(t,\tau) | b \rangle (\tau) \Delta\theta_0(\tau) d\tau \quad (2)$$

- using overlay specifications:
 - First item
 - Second item.
- with the definition of the propagator as:

$$\partial_t \Phi(t,\tau) = M(t)\Phi(t,\tau); \quad \Phi(\tau,\tau) = I, \quad (3)$$

You can create overlays...

• using the pause command:

$$\begin{cases}
\partial_t \boldsymbol{\sigma_0}(t) = M^{\flat} \boldsymbol{\sigma_0}(t, 0) + |b \rangle \Upsilon(t) \\
g(t) = \langle c | \boldsymbol{\sigma_0}(t, 0), \end{cases} \tag{1}$$

•

$$\Delta\theta(t) = \langle c(t) | \Phi(t,0) \boldsymbol{\prime} \boldsymbol{\eta}_0^r + \langle c | (t) \int_0^t \Phi(t,\tau) | b \rangle (\tau) \Delta\theta_0(\tau) d\tau \quad (2)$$

- using overlay specifications:
 - First item.
 - Second item
- with the definition of the propagator as:

$$\partial_t \Phi(t,\tau) = M(t)\Phi(t,\tau); \quad \Phi(\tau,\tau) = I, \quad (3)$$

You can create overlays...

• using the pause command:

$$\begin{cases}
\partial_t \boldsymbol{\sigma_0}(t) = M^{\flat} \boldsymbol{\sigma_0}(t, 0) + |b \rangle \Upsilon(t) \\
g(t) = \langle c | \boldsymbol{\sigma_0}(t, 0),
\end{cases} \tag{1}$$

$$\Delta\theta(t) = \langle c(t) \mid \Phi(t,0) \boldsymbol{\gamma}_0^r + \langle c \mid (t) \int_0^t \Phi(t,\tau) \mid b > (\tau) \Delta\theta_0(\tau) d\tau \quad (2)$$

- using overlay specifications:
 - First item.
 - Second item.
- with the definition of the propagator as:

$$\partial_t \Phi(t,\tau) = M(t)\Phi(t,\tau); \quad \Phi(\tau,\tau) = I, \quad (3)$$

You can create overlays...

• using the pause command:

$$\begin{cases}
\partial_t \boldsymbol{\sigma_0}(t) = M^{\flat} \boldsymbol{\sigma_0}(t, 0) + |b \rangle \Upsilon(t) \\
g(t) = \langle c | \boldsymbol{\sigma_0}(t, 0),
\end{cases} \tag{1}$$

$$\Delta\theta(t) = \langle c(t) \mid \Phi(t,0) \boldsymbol{\gamma}_0^r + \langle c \mid (t) \int_0^t \Phi(t,\tau) \mid b > (\tau) \Delta\theta_0(\tau) d\tau \quad (2)$$

- using overlay specifications:

Our Results/Contribution

Main Results

Our Results/Contribution

Basic Ideas for Proofs/Implementation

- The first main message of your talk in one or two lines.
- The second main message of your talk in one or two lines.
- Perhaps a third message, but not more than that.

- Outlook
 - Something you haven't solved.
 - Something else you haven't solved.
