

Arctique – Effet de la suppression de la neige

Simulation ARCTIC2
paramètre snow_so num

Effet isolant de la neige =>
amplifie la formation et la fonte

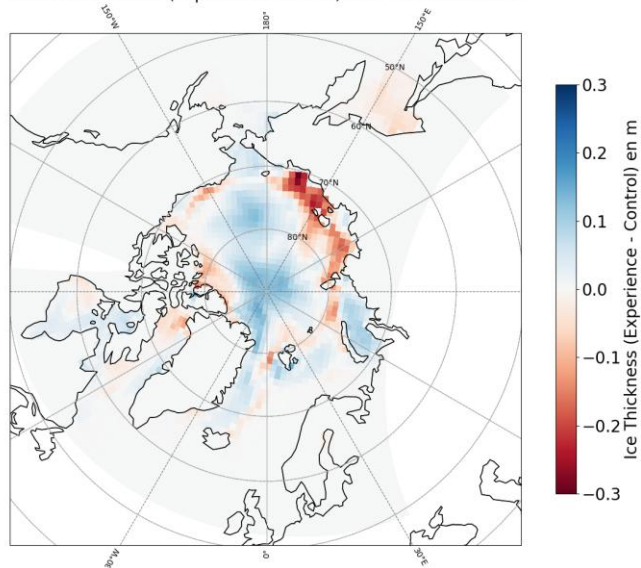

Étendue peu changée surtout
épaisseur

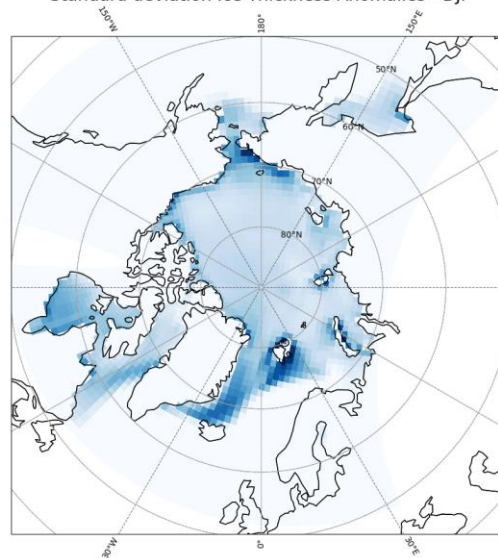

Répartition de la glace

+ Épaisse au centre
- Épaisse sur les côtes surtout en été/automne

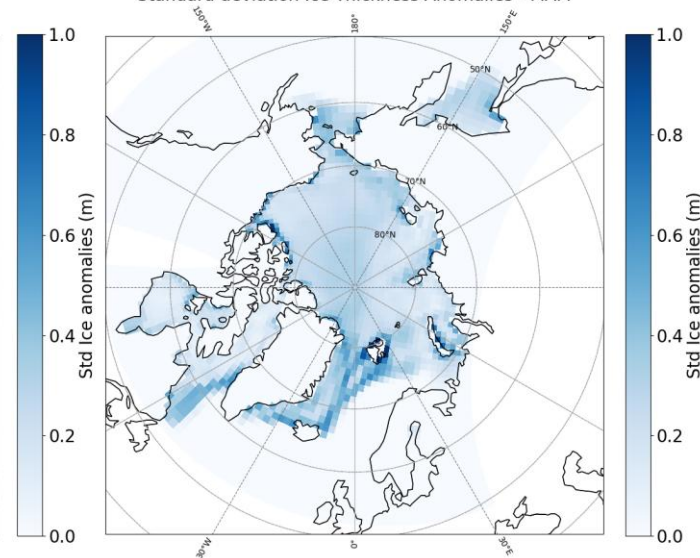

Mean ice thickness (Experience - Control) over the Arctic Ocean

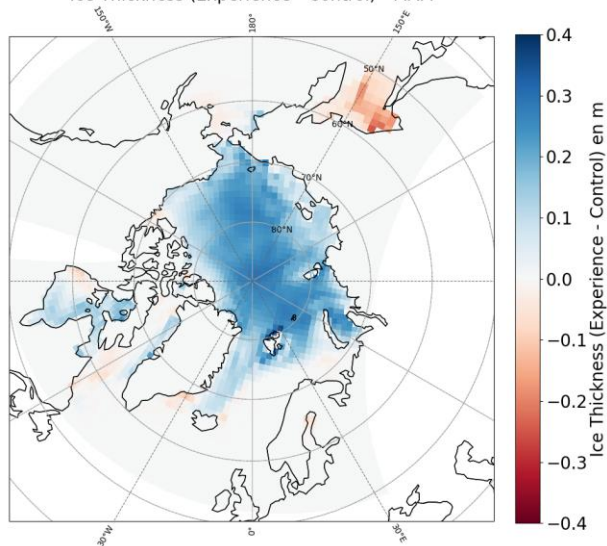

Standard deviation Ice Thickness Anomalies - DJF

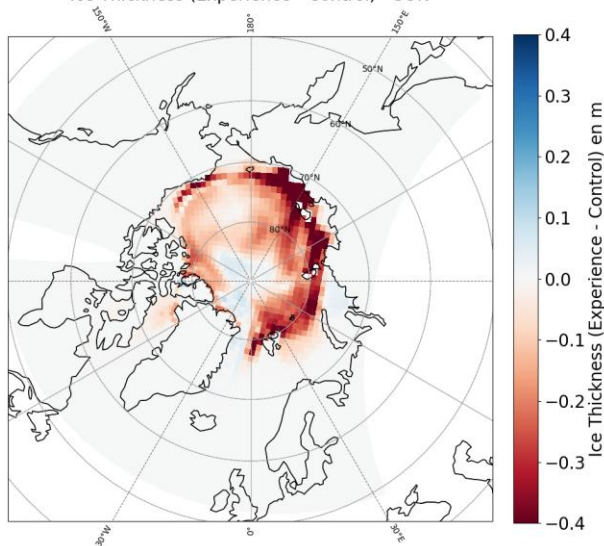

Standard deviation Ice Thickness Anomalies - MAM

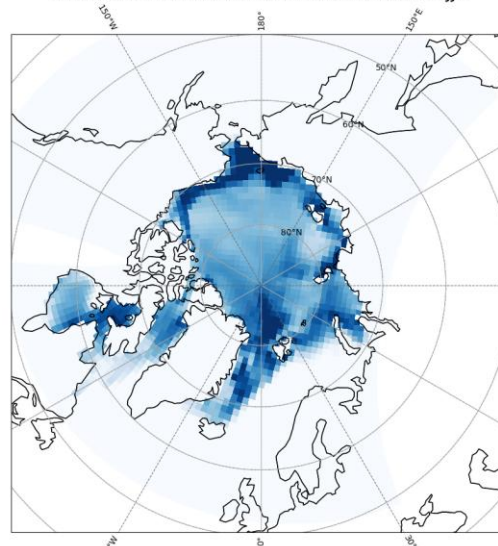

Ice Thickness (Experience - Control) - MAM

Ice Thickness (Experience - Control) - SON

Standard deviation Ice Thickness Anomalies - JJA

Standard deviation Ice Thickness Anomalies - SON
