

A box plot showing the distribution of 'Abnormal Points'. The plot includes a central box representing the interquartile range (IQR) from the 25th to the 75th percentile. A thick horizontal line within the box indicates the mean. Dashed vertical lines extend from the box to horizontal caps at the minimum (Min) and maximum (Max) values. Several outliers are plotted as open circles above the upper whisker, with the text 'Abnormal Points' placed to the left of each outlier.
